V3P-x-RGB

Designed for use with 3 channel constant voltage LED fittings and 3 channel LED tape light with potential-free switching connections. Maximum Wattage of 120W shall be supported for overall supply range (All three Channels). Requires a suitable external D.C. power supply (normally the power supply that would be supplied with the fitting for dimming application). Can be easily integrated with existing Vavis Network and can be controlled using all supported gateway modules.

Features

Wireless G-Connect

Vavis products inter-communicates on wireless G-Connect protocol. It's interactive, functional & reliable with no line-of-sight control.

4 Way Control Feedback

Controlling a Light/Fan from multiple panels with feedback is now possible without any additional cabling, using G-Connect wireless protocol.

Retrofittable Panels

Fits in Indian or EU standard flush mounting boxes. To install Vavis, simply connect the wiring to the electronic module, attach it to the box & apply the glass panel.

Access Anywhere

Now control your lights using iPads, iPhone, Android, PC or Mac locally or from remote location using third party control processors.

Multi-Touch Capsense

Reliable & responsive multi-touch technology and works even with wet or moist hands.

Best of both worlds

Vavis panels have flexibility to connect both raw and inverter power supply. Hence flexibility to match any project requirement.

Wake-Up Sensor

Integrated Proximity Sensor activates the panel backlit when your hand approaches it.

Energy Saving

Vavis lighting control is designed to provide energy efficient solution.

Lighting Automation

Illuminate your life with brilliant automated lighting solutions from VAVIS. Instantly set the mood with controls that can make a reception area feel more inviting, an outdoor area feel safer, or a living room feel cozier – all at the touch of a button. VAVIS can connect commercial or residential lighting systems to provide greater control and lower energy usage no matter if it's for a meeting room, a home, or an entire campus.

Security

Integrated lighting automation isn't a luxury; it's a necessity. Protect your home or business through the use of automated lighting at preset times, deterring potential intruders by creating the impression that your home or business is occupied. Lights can even be set to turn on as you arrive home, so you never have to enter a dark house again. And if an emergency ever arises, escape paths can be lit automatically to help guide occupants to safety.

Flexibility with Savings

VAVIS systems not only integrate seamlessly into your lifestyle, but also into your décor. Whether adding lighting to new installations or retrofits, eliminate the need for complicated wiring and rewiring using our reliable wireless lighting control solutions. VAVIS makes -adding a lighting control system, or expanding one, simple and easy.

At Home or Away

Using third party automation control system, you can control VAVIS lighting on a device that's always at your fingertips – your smartphone or tablet. Prepare any room in your home or office using automated scheduling feature. It's convenience and peace of mind in the palm of your hands.
