About Us

AL IKHLAS is a systems integrator and Information Technology Solutions company. The company designs, sells, implements, integrates, and manages computer hardware and software systems, local area networks (LANs), wide area networks (WANs), complete Audio Visual Setups, Structured Cabling for Data & Voice, EPABX Systems and client/server applications as well as emerging technologies such as Mobile computing, wireless networks, remote network access/Remote control, Enterprise Messaging, wide area Wireless Networking and many more.

Established since 2005 in Dubai, and powered by a remarkably polished and cultured team with a differentiated market approach, AL IKHLAS has successfully influenced a market penetration and within a record period of time, has become an acknowledged force in the Corporate Service Industry.

We recommend technologies to the client based on what is best for the client. AL IKHLAS provides technology solutions, services and products for a large number of SMB's, Enterprise Customers and Public Sector Organizations. Extending across a range of industry segments and business domains, our solutions have helped our valued customers derive value from their technology investments and enhance competitiveness. We ensure that our solutions have a direct and measurable impact on your organizations competitiveness.

Thus, AL IKHLAS caters to all the requirement of the SMB's and large corporate customers. Providing after sales support has been appreciated by all our customers and probably it is the single most reason for our continuous growth.

Our goal is to offer our clients solutions based around the latest technology and products and to deliver them to the very highest standards

In House Customer Engineering

Engineers dedicated to testing, configuring, building and repairing systems, utilizing a comprehensive stock of spare parts and modern and sophisticated test equipment. In addition to routine maintenance, research and development is undertaken where special projects are carried out on behalf of customers. A fully mobile team of senior engineers specializing in site survey prior to installation, initial hardware installation services and ongoing on site preventative maintenance and repair support to customers with maintenance contracts.

Our Valued Clients

Our clients are corporate clients to small and medium businesses and the list continues to grow as we evolve as a leading IT solution provider. Some of our valued Corporate clients include:

Customer Orientation is valuing the customer who is the soul of any business and it is only fitting that they define the dimensions of our corporate existence. Our job is to satisfy our customers, always.

Why Choose Ikhlas Computers

- Our experienced staff can deliver what is promised within the timeframe set as per the workflow agreed upon with speed and accuracy.
- We are customer focused and will advise you in choosing the right materials and design and within your budget
- We offer a full maintenance contract to assist you with any problems that may arise after the warranty period at very competitive rates.
